

# HR Software for Culture-Centric Companies

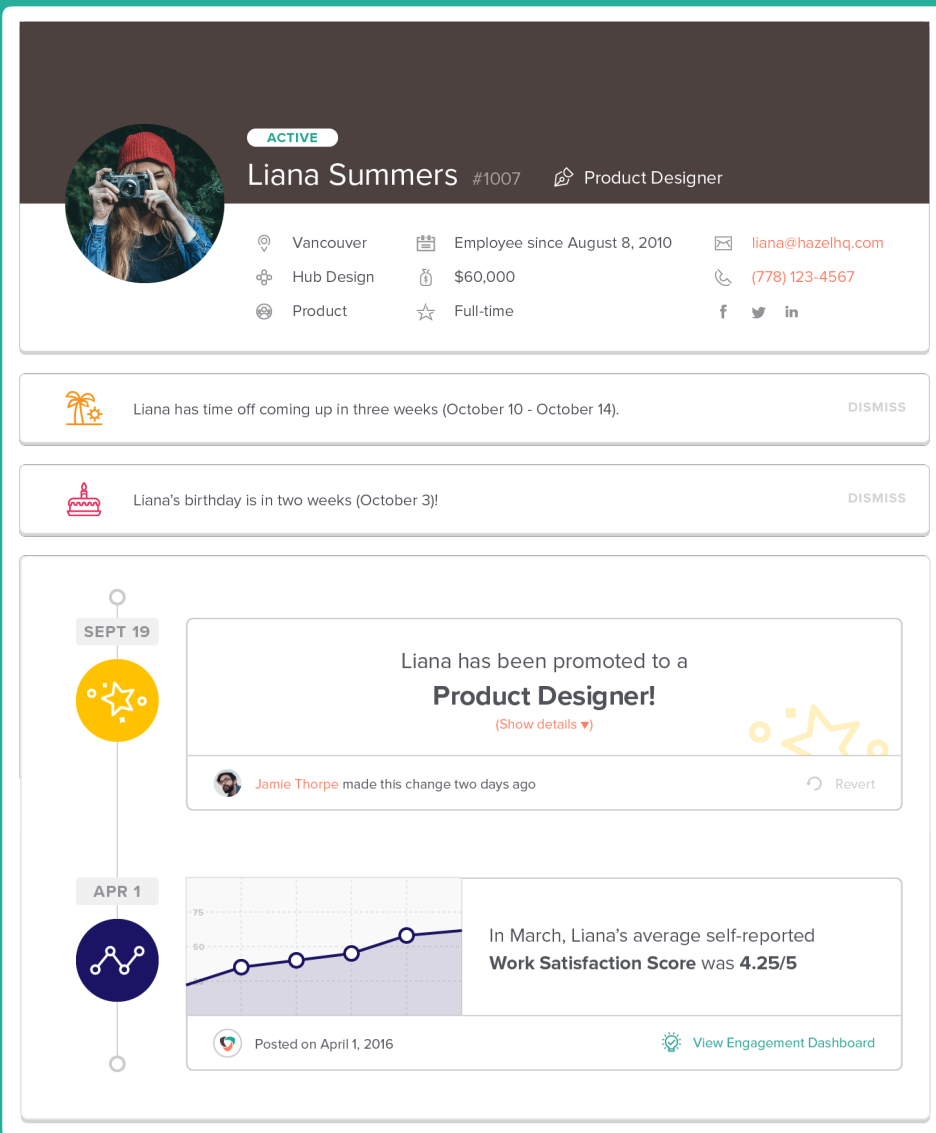

For HR teams focused on creating an amazing employee experience, fostering a great culture, and driving team engagement, Hazel offers a platform that supports all of your initiatives and objectives:

- **Save dozens of HR person-hours per year** with an intuitive system of record to maintain employee information, digital paperwork, and more. Empower employees to enter their own info during onboarding and update it as things change.
- **Help employees take time off** with custom PTO policies and an intuitive interface for submitting requests. Make it easy for managers to review and action requests, and plan their team's capacity.
- **Get actionable insights** into how engaged and happy your employees are with lightweight, intuitive surveys.

With all people-related data and tools under one roof, it's easy to see what every single employee needs to succeed:

- **Employees** can view their entire journey within your company at a glance.
- **Managers** see how their team members, both local & remote, are doing and can tailor their leadership style accordingly.
- **HR teams** get a bird's-eye view of the company and can jump in where you're needed most.

The screenshot displays the Hazel HR software interface for an employee named Liana Summers. At the top, there is a profile card with a photo of Liana, her name, ID #1007, and title 'Product Designer'. Below this, a grid of information includes location (Vancouver), department (Hub Design), salary (\$60,000), and employee type (Full-time). A row of social media icons (Facebook, Twitter, LinkedIn) is also present. Below the profile card, there are two notification banners: one for time off coming up in three weeks (October 10 - October 14) and another for her birthday in two weeks (October 3!). The main content area features a vertical timeline with two key events: a promotion to 'Product Designer' on September 19th, announced by Jamie Thorpe, and a work satisfaction score of 4.25/5 in March, with a link to view the engagement dashboard. The interface is clean and modern, with a teal and white color scheme.
